

## Muhammad Moeed Asif

**ID:** 1210192323279 | **Work permit:** Pakistani | **Date of birth:** 03/08/2002 |

**Nationality:** Pakistani | **Gender:** Male | **Phone number:** (+92) 3169906955 (Mobile) |

**Email address:** asifmoeed2@gmail.com | **Website:** <https://moeedasif-portfolio.vercel.app/> |

**LinkedIn:** [moeedasif38](#) | **Whatsapp Messenger:** Whatsapp |

**Address:** Green Town Near Qurtuba College Dera Ismail Khan, 29050, Dera Ismail Khan, Pakistan (Home)

### ABOUT ME

AI Engineer with experience in developing machine learning models and AI solutions. Proficient in Python, TensorFlow, PyTorch, and generative AI technologies including LLMs and computer vision. Proven track record in building scalable AI systems, voice assistants, and automated solutions. Experienced with cloud platforms (AWS, Azure) and MLOps practices...

### EDUCATION AND TRAINING

01/09/2021 – 10/06/2025 Islamabad, Pakistan

**BACHELOR OF COMPUTER SCIENCE** National University of Computer and Emerging Sciences

**Website** <https://www.nu.edu.pk/> |

**Field of study** Computer use , Database and network design and administration , Software and applications development and analysis

**Level in EQF** EQF level 6

### WORK EXPERIENCE

**COMPUTER VISION PROJECT ENGINEER – XIS.AI** – 26/01/2026 – Current – STERNENFELS, GERMANY

- Leading a computer vision research and development team of two developers, driving end-to-end AI solution development for industrial automation and intelligent monitoring systems.
- Conducting applied computer vision research focused on industrial inspection, real-time object detection, defect analysis, and intelligent surveillance systems using deep learning and modern vision architectures.

**JUNIOR AI ENGINEER – CARECLOUD** – 20/06/2025 – 13/01/2026 – BAGH, PAKISTAN

- Spearheaded research and development of agentic and generative AI solutions, achieving an 80% improvement in healthcare product efficiency through advanced AI implementations.
- Partnered with cross-functional teams including product managers, software engineers, and healthcare professionals to ensure seamless AI integration from development through production deployment.
- Engineered OCR systems, RAG-based intelligent assistants, and autonomous agents to enhance clinical support services and streamline healthcare workflows

### SKILLS

Microsoft Word | Microsoft Office | Social Media | understand spoken English | industrial software | Software Development and Software Engineering | Artificial Intelligence and Machine learning | COMPUTER VISION | manage engineering project

### LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

|                | UNDERSTANDING |         | SPEAKING          |                    | WRITING |
|----------------|---------------|---------|-------------------|--------------------|---------|
|                | Listening     | Reading | Spoken production | Spoken interaction |         |
| <b>ENGLISH</b> | B2            | B2      | B1                | B1                 | B1      |
| <b>GERMAN</b>  | A2            | A2      | A2                | A2                 | A2      |

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

## DIGITAL SKILLS TEST RESULTS

|                                 |                 |             |
|---------------------------------|-----------------|-------------|
| Information and data literacy   | <b>ADVANCED</b> | Level 5 / 6 |
| Communication and collaboration | <b>ADVANCED</b> | Level 5 / 6 |
| Digital content creation        | <b>ADVANCED</b> | Level 5 / 6 |
| Safety                          | <b>ADVANCED</b> | Level 5 / 6 |
| Problem solving                 | <b>ADVANCED</b> | Level 5 / 6 |

Results from a [self-assessment](#) based on [The Digital Competence Framework 2.1](#)

## PROJECTS

06/03/2026 – 29/04/2026

### Walmart Warehouse Monitoring System

- Developed an AI-powered vision security monitoring pilot/mvp solution for Walmart Innovation Demo Lab focused on intelligent surveillance and real-time monitoring for warehouse security.
- Implemented computer vision pipelines using object detection and video analytics techniques to improve operational awareness and automated violation detection capabilities

24/03/2025 – 20/05/2025

### RAG-based Medical Assistant

- Developed a RAG-based AI assistant for TalkEHR's (MTBC CareCloud's largest electronic health record management system) Document Management System.
- Enabled document summarization and intelligent question answering, reducing human effort by over 90%.

01/10/2025 – 10/01/2026

### Medical Billing Automation

- Developed and deployed a full-scale medical billing automation system that extracts patient data from superbills and automates the end-to-end billing workflow.
- Designed a scalable cloud-based architecture that reduced manual effort across a 220-person healthcare ecosystem while improving billing accuracy by over 95%..

01/09/2024 – 01/04/2025

### DataGenie

- Developed Data Genie, an AI-powered data generation and augmentation system designed to create high-quality synthetic fabric datasets for training computer vision models to improve quality assurance in the textile industry.

## CERTIFICATIONS

---

AWS, 12/12/2024

### AWS Academy Cloud Foundations

---

AWS Academy Cloud Foundations provided me with foundational knowledge of cloud computing concepts and Amazon Web Services (AWS) core services. The course covered cloud architecture, security, networking, storage, compute services, pricing models, and AWS best practices. It helped me understand how to design and deploy scalable, secure, and cost-effective cloud solutions using AWS technologies.

Coursera, 08/03/2025

### Generative AI with Large Language Models

---

The Generative AI with Large Language Models course provided me with a strong understanding of modern AI concepts, including LLM architectures, generative AI workflows, prompt engineering, and model fine-tuning techniques. The course explored how large language models are developed, trained, and applied to build intelligent AI-powered applications. It enhanced my knowledge of practical Generative AI solutions and real-world AI use cases.
